

SPRING 2022 INTERDISCIPLINARY COURSES:

Policy & Technology

| Course | Time/Location | Description |
|--|-------------------------------|--|
| EDF 5652: Policy Development in Education | Wed, 3:05-5:35 PM STB G152 | This course explores the United States' policymaking process in all its stages including problem identification, agenda setting, policy formation, policy adoption, implementation and evaluation. In so doing, it surveys a broad range of K-12 and postsecondary education policies. |
| EEC 5615: Issues and Trends in Early Childhood Education | Online | This course identifies issues and trends in the area of early childhood education and addresses possible causes and relationships. |
| EME 5250: Open Learning and Open Educational Resources | Online | This course addresses the historical and social context of open learning and open education resources (OER), and engages students directly in the design, development, and implementation of open learning experiences and resources. |
| EME 6507: Development of Multimedia Instruction | Online | This course is a study of the evolution of multimedia instruction, with an emphasis on contemporary research and theory. Includes practice in the design and development of multimedia learning systems. |
