Purpose & Description: CHAOS at FSU is organizing two events as part of their annual lecture series entitled, "Health Service Psychology: Practice, Research, and Advocacy". The lecture series is focused in these areas to align with the professional identity of counseling psychology that emphasizes the practice of evidence-based psychotherapy and assessment, the development of a scientist-practitioner ethos, and engaging in social justice advocacy to align with the values of diversity, equity, and inclusivity. One event would take place in Spring 2022, with a tentative date of April 14, 2021, and the other to take place in Summer 2022, with a tentative date of June 16, 2022. These would be the lectures with the themes of Research and Advocacy, respectively. The organization is requesting funding for food to feed 50 or more guests in attendance and provide compensation to two Honorarium Speakers.

Itemized Expenditures:

Quantity	Description	Unit Price
50	Food	\$300
2	Contractual Services (i.e., DJ, Honorarium Speaker)	\$1,500

Total: \$1,800

To the Speaker of the 30th Congress of Graduate Students,

The following is a request for funding from the RSO Counseling and School Psychology Students Helping to Advocate Organize and Service (CHAOS at FSU). The organization requests \$1800 to host two events associated with the initiation of an annual speaker series titled "Health Service Psychology: Practice, Research, and Advocacy".

The lecture series is focused in these areas to align with the professional identity of counseling psychology that emphasizes the practice of evidence-based psychotherapy and assessment, the development of a scientist-practitioner ethos, and engaging in social justice advocacy to align with the values of diversity, equity, and inclusivity. The speaker series is also designed to maximize awareness of local professionals by working to identify health service psychologists in the state of Florida with expertise in a variety of areas. In the area of practice, future speakers might be invited to discuss their expertise in topics such as specific therapeutic orientations (e.g., dialectical behavioral therapy), treatment modalities (e.g., prolonged exposure therapy), specific assessment instruments (e.g., MMPI-3), or other professional issues in psychotherapy (e.g., best practices in Telemental health). In the area of research, future speakers might be invited to discuss their research autobiography (i.e., how they grew in the practice of research and their current focus of interest), use of a variety of psychology research methods (e.g., randomized controlled trials), the relationship between their research program and their practice of psychotherapy, or other relevant research issues (e.g., ethical research practices). Finally, in the realm of advocacy, we hope to invite speakers with specific knowledge of the needs of a variety of marginalized and underserved groups to help build psychologists-in-training knowledge, skills, and awareness of issues important for those groups, as well as individuals with specific understanding of a variety of methods of advocacy to help build awareness and ability in helping make systemic changes to benefit society. At this time, the organization has identified several local professionals that can meet these three topic areas for the coming year and we must seek funding before we can begin working with SGA accounting to secure speaker contracts.

Importantly, this speaker series of benefit to the student body as a whole because it can help build interest in undergraduates to pursue graduate level training in mental health professions. It can also benefit all FSU students currently enrolled in programs associated with mental health and social justice advocacy.

One event would take place in Spring 2022, with a tentative date of April 14, 2021, and the other to take place in Summer 2022, with a tentative date of June 16, 2022. These would be the lectures with the themes of Research and Advocacy, respectively. This is sufficient time to allow for the contract to be confirmed by the speaker and the event space to be reserved. A statement of understanding from our organization has been signed and submitted to SGA accounting. The RSO expects full attendance by the 31 registered members of the organization and of general interest to all graduate students in mental health service related programs. Advertising of the event will take place through emails to related departments, social media, and flyers around campus. The funding allocation request is as follows:

\$1500 Honorarium/Contractual Services

\$300 Food

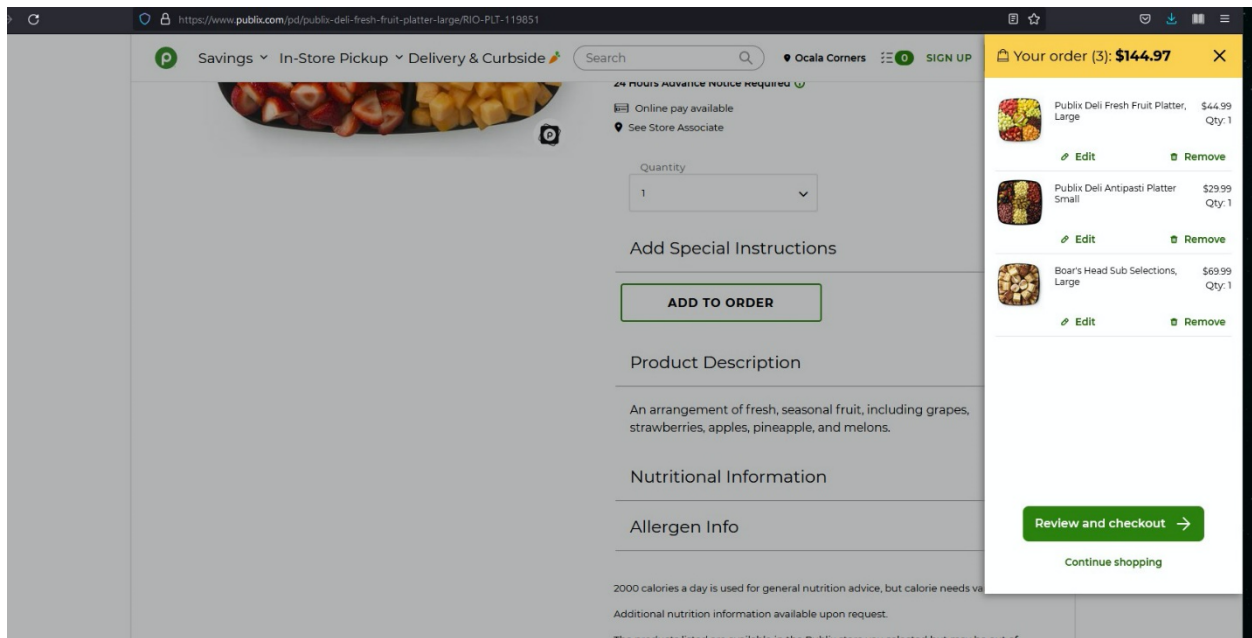

\$1800 Total

Group	Program Title, Date, Location	Contractual Services	Expense	Food	Clothing & Awards	Total
CHAOS at FSU	2 nd and 3 rd Lecture (Practice) in Series on Health Service Psychology: Practice, Research, and Advocacy; April 14, 2022 at 7:00PM; June 16, 2022 at 7:00PM; Globe Auditorium	1500 Honorarium		300 Sandwich Trays from Publix on Ocala		1800

Thank you for your consideration,

Michael J. Morgan, Jr.

President of CHAOS at FSU

Proposed Speakers

April 2022 – Dr. Ryan -Duffy – Research Theme

Dr. Duffy is a professor in Counseling Psychology at the University of Florida. He is internationally recognized as one of the leading researchers in vocational psychology. He developed the Psychology of Working Theory, a vocational theory aimed at understanding and overcoming the negative effects of marginalization on an individual's ability to secure decent work. His talk would be a "scholarly autobiography", with a discussion of how his research program began as a graduate student and how it has evolved into his current interests and work.

June 2022 – Dr. Anika Fields – Advocacy theme

Dr. Fields is a licensed psychologist and the director of the Office of Counseling Services at Florida A&M University. She has previously been the director of the FSU University Counseling Center and oversaw the creation of the APA-accredited doctoral internship here. She has experience advocating for high quality mental health services for university students as evidenced by her strong relationship with university administrators and her success in expanding evidence-based therapy services to students on both campuses.
