# NCAR EXPLORER SERIES

## Everything the Atmosphere Touches Student Opportunities at NCAR | UCAR | UCP

Photo courtesy of UCAR

Are you interested in conducting scientific research in the interdisciplinary field of Earth system science (atmospheric sciences, solar and space physics, engineering, computer science, or other STEM fields)? Internships help you explore different career paths, apply your learning outside of the classroom, and build life-long skill sets and connections across multiple disciplines. In this NCAR Explorer Series event, our panelists will talk about the myriad types of support you'll receive as a student through mentorship, networking, and professional development by participating in one of our student programs.

### JOIN THIS VIRTUAL PROGRAM

**WEDNESDAY, NOVEMBER 3  
4-5 P.M. (MST)**

**Register here:**

<https://forms.gle/dgjwNe76Hzcva7WcA>

**Jerry Cycone**  
NCAR E&O

**Virginia Do**  
NCAR CISL

**Kadidia Thiero**  
UCAR SOARS

**Erin Lincoln**  
SIParCS Alumna  
Brown Univ.

**Christopher Williams**  
SOARS Alumnus  
Univ. Florida
