PLAN C
FOR CIVILIZATION

World-renowned researcher David Keith and for-profit start-up Make Sunsets spark a global question with life-or-death stakes: How far are we willing to go to cool the planet? Part thriller, part wake-up call, PLAN C FOR CIVILIZATION reveals the hidden world of climate tech, and asks whether or not we can still afford to ignore one of the most controversial ideas on Earth.

PLAN C FOR CIVILIZATION is a documentary film that tackles the promise and peril of solar geoengineering. From Bangladesh to Nevada, solar geoengineering is emerging after more than 60 years in the shadows, and with it, a new chapter of the climate change saga. The film, with exclusive verite access to its protagonist David Keith and the SCoPEX project as well as the rogue geoengineers of Make Sunsets, had its World Premiere at DOC NYC in 2025.
