

Are you a 6-12 mathematics teacher?

Have you taught three years or less?

Have you taught about data or statistics?

ESTEEM II wants to learn about early career mathematics teachers' expertise and practice in teaching statistics and data for those who have taught less than 3 years. Participants will engage in surveys and assessments that will provide insight into the expertise and practice of beginning mathematics teachers who teach statistics and data.

This project is supported by the NSF under DUE 2141727.

Participants will receive \$150 for their time.

If you would like to participate and be considered for research incentives, please consent: bit.ly/ESTEEMconsentECMTb. Contact Dr. Gemma F. Mojica at gmmojica@ncsu.edu with any questions. This is NOT a condition of your employment.

Half of participants selected will be early career mathematics teachers who used ESTEEM materials in their undergraduate teacher education program.
