I. CANDIDATE INFORMATION

Education

- 2016** **Doctor of Philosophy in Design, Construction, and Planning**
College of Design, Construction, and Planning, University of Florida,
Gainesville, FL
Minor in Research Evaluation Methodology: Quantitative Methods,
Dissertation: "Toward design strategies for fall prevention: A case-control study of
home safety in a senior living community"
- 2010** **Master of Science in Housing & Interior Design**
College of Human Ecology, Yonsei University, Seoul, South Korea
Thesis: "Planning for healing environment through evidence-based design:
Focusing on geriatric hospital"
- 2008** **Bachelor of Science in Engineering (Architectural Engineering)**
College of Engineering, Inha University, Incheon, South Korea

Professional Experience

- 2024** **Associate Professor**
Department of Interior Architecture and Design, College of Fine Arts, Florida State
University, Tallahassee, FL
- 2018-
2024** **Assistant Professor**
Department of Interior Design, College of Design, Iowa State University, Ames, IA
Human-Computer Interaction Graduate Program (affiliated faculty)
- 2017-
2018** **Post-Doctoral Research Fellow of Housing Research**
Department of Family and Consumer Sciences, North Carolina Agricultural and
Technical State University, Greensboro, NC
- 2012** **Part-time lecturer (one semester)**
Department of Interior Design, Shin Ansan University, Ansan, South Korea
- 2010-
2012** **Design Researcher**
Urban Research Lab, Seoul Housing & Communities Corporation, Seoul, South
Korea
- 2001-
2003** **Interior Designer**
OI Design Studio, Seoul, South Korea

Licensure / Certification

- 2018 **Certified Aging in Place Specialist (CAPS)**
National Association of Home Builders
- 2016 **Evidence-Based Design Accreditation & Certification (EDAC), CHD-102886**
The Center for Health Design
- 2016 **LEED Green Associate, # 0011090733**
U.S. Green Building Council
- 2016 **Interdisciplinary Certificate in Gerontology**
University of Florida, FL, Gainesville
- 2008 **Engineer Architecture, #072011023360**
Human Resources Development Services of Korea, South Korea
- 2005 **Industrial Engineer Interior Architecture, South Korea, #05202075345J**
Human Resources Development Services of Korea, South Korea

Graduate Advising - Committee Member (Masters)

- 2023 **Andrea Burbano**, Master of Arts, Department of Interior Design. Promoting Children's Engagement in Pediatric Healthcare Waiting Rooms from Colombia
- 2021 **Meng Wang**, Master of Science, Department of Human-Computer Interaction, Creative component Title: A smart home visualization tool
- 2021 **Erendira Gonzalez**, Master of Arts, Department of Graphic Design, Creative component Title: Rebranding & pop-up shops: small businesses and brand experience
- 2021 **Ye Jin Chang**, Master of Fine Arts, Department of Interior Design, Thesis Title: Creating the multisensory brand experience in coffee shops
- 2020 **Nan Hui**, Master of Fine Arts, Department of Graphic Design, Thesis Title: Study on the wechat app to improve user experience for Chinese older adults

- 2020 **Taylor Johnson**, Master of Arts, Department of Interior Design, Thesis Title: Customizable and adaptable furniture: Designing for millennial lifestyles and environmental concerns
- 2020 **Yue Yang**, Master of Fine Arts, Department of Graphic Design, Thesis Title: HUEMXN: An emotion-oriented perspective on developing empathy
- 2020 **Allison Brown**, Master of Arts, Department of Interior Design, Thesis Title: Mortuaries and mindfulness: The study of incorporating meditation spaces into modern mortuaries

Graduate Advising - Committee Member (Ph.D.)

- 2023 **Guy-Serge Emmanuel**, Doctor of Philosophy, Human and Computer Interaction, Dissertation title: Exploring race and ethnicity in UX design practice, literature and graduate curriculum
- 2022-
Present **Carie Fisher**, Doctor of Philosophy, Human and Computer Interaction, Dissertation title: Digital Accessibility Survey of Information Technology (IT) Professionals
- Hongyi Bian**, Doctor of Philosophy, Human and Computer Interaction, Dissertation title: TBD (Smart home technologies, blockchain, and digital health)

Graduate Research Assistant Supervised

- 2019
Spring **Holle Michoski**, Holle conducted a survey and interview with older adults in a retirement community to understand their perception of their home lighting system. Funding source: Bridging the Divide from the office of the vice president for research
- Yejin Chang**, Yejin conducted a lighting assessment by measuring lighting intensity and types in older adults' houses. Funding source: Bridging the Divide from the office of the vice president for research
- 2021
Spring **Hanieh Baktash**, Hanieh helped to create a home assessment tool for aging in place. Funding source: 2020 BNIM Regenerative Design Challenge Grant
- 2021
Summer **Margaret Parks**, Margaret helped to create a home assessment tool for aging in place. Funding source: 2020 BNIM Regenerative Design Challenge Grant

Undergraduate Research Assistant Supervised

- 2021 Fall - **Laura Maschino** and **Kayley Tuchek**, Laura and Kayley helped to create a floor plan, diagrams, and renderings for the healthcare design book publication.
- 2022
Spring Funding source: Publication Subvention Grant - Scholarly work: Space planning for Healthcare settings

Student Awards

- 2024 **Emily Drennen Hatch & Ryan VerMulm**, placed in the First Place in the American College of Healthcare Architects (ACHA) 2023-2024 Inaugural Student Design Competition. Cameron Campbell taught the Architecture Studio 2023 Fall semester and I participated this class as a co-instructor (30%)
- Krista Smith, Metropolis Future 100 program**, selected for the Future 100 cohort.
- 2019 **Erendira Gonzalez, Steelcase design competition award**, placed in the top 10 of the 6th Annual Steelcase NEXT Student Design Competition. She was one of

five honorable mentions awarded out of 900 entries from 70 university programs nationwide (*Supervised her works in a design studio in 2018 Fall semester*)
[ISU interior design projects win top 10 recognition in Steelcase NEXT Student Design Competition : Iowa State University College of Design \(iastate.edu\)](https://www.design.iastate.edu/news/2024/01/aia-aah-steris-student-design-charrette/)

Student Accomplishments

- 2023** **AIA-AAH STERIS Student Design Charrette Mentor**, Students: Emily Hatch (Architecture), Ryan VerMulm (Architecture), Juan Kim (Interior Design), and Angelica Lebron-Aponte (Interior Design), Healthcare Design Conference, Cleveland, OH, November 3-7, 2023,
<https://www.design.iastate.edu/news/2024/01/aia-aah-steris-student-design-charrette/>
- 2021** **AIA-AAH STERIS Student Design Charrette Mentor**, Students: Keegan Holdrof (Architecture), Megan Adams (Landscape), Brandon Leeder (Architecture), Maggie Parks (Interior Design), Healthcare Design Conference, Cleveland, OH, October 21-26, 2021 (Role: Co-mentor with Campbell)
- 2020** **AIA-AAH STERIS Student Design Charrette Mentor**, Students: Matthew Bong (Architecture), Calise Gritters (Architecture), Lexis Ruroden (Interior Design), Emily Serchen (Landscape), Healthcare Design Virtual Conference, November 6-8, 2020 (Role: Co-mentor with Campbell)
- 2018** **AIA-STERIS Student Design Charrette Mentor**, Students: Mathew Townsley (Architecture), Babafemi Ade-Aina (Architecture), Haley Eckenrod (Interior Design), Taylor Danger (Landscape), Healthcare Design Conference, Phoenix, Arizona, November 9-11, 2018 (Role: Co-mentor with Campbell)

Curriculum Development

- 2023**
Spring **ARTID 570X: Social Entrepreneurship in Aging (New class)**: Based on mission and vision of our university, I developed a new class focusing on social entrepreneurship in Aging. Students explored various issues of social, behavioral, and health and well-being in later life and created a design solution to address specific problems.
- 2022**
Spring **ARTID 569A: Environmental Psychology for Design (New class)**: This course was dedicated to understanding human-environment interactions at the different layers of psychology and human behaviors. Students examined the complex interaction and impact of the built environment on human emotion and behavior through the context of social, behavioral, cultural, and environmental variables.
- 2021 Fall** **DSN S 501X: Introduction to Research Design**: This course was significantly redesigned. I developed new syllabus, course schedule, lectures, assignments, reading materials, project, and in-class activities
- 2019 Fall** **ARTID 551A: Design humanics Sensory perception & ergonomic factors**: This course was significantly redesigned. I developed new lectures, assignments, reading materials, projects, and in-class activities. Especially, this class had a joint project of smart home design with students in Geron-technology class (COM 414+514) and gerontology in 2019 and 2020 Fall semester

2019 Spring **ARTID 552: Evidence-based Design (New Class):** I designed this new course by developing new course materials, syllabus, weekly schedule, assignments, grading rubrics, lectures, in-class activities and projects. This course introduced Evidence-based Design which is a process for the conscientious, explicit, and judicious use of current best evidence from research and practice in making critical decisions. This class explored how to find, evaluate and synthesize evidence and translate it for design application in a physical environment.

2019 Spring **DSN S 3: Wellness Studio:** Campbell and I have significantly redesigned course materials, syllabus, lectures, field trip plan, and design projects. The studio focused on various healthcare facilities. With human-centered design and evidence-based design approach, Students designed various wellness and therapeutic environment considering social awareness with an emphasis on patients, family and healthcare staff in their physical environment.

Grants for Teaching (Studio development)

2024 **ISU & Shive-Hattery Healthcare Design Studio: DSN S 546 (Interdisciplinary studio),** Co-PI with Campbell (\$10,000)

2020-2021 **ISU & Shive-Hattery Healthcare Design Studio: DSN S 546 (Interdisciplinary studio),** Co-PI with Campbell (\$20,000)

Professional Development

2022-2023 **Research Collaboration Catalysts**

2022 Fall **Active Learning Institute (ALI)**

2020 Summer **CELT 2020 Summer Course Design Institute (CDI)**

IV. RESEARCH/CREATIVE ACTIVITIES

Grants for Research

External Grants for Research

- 2020 **American Occupational Therapy Foundation** - Health Services Research (\$50,000)
Title: Predicting Individuals' Functional Difficulties at Home Using Statistical Machine Learning (P.I: Mi Jung Lee; Collaborator; Romero, Castaneda, Bliznyuk, and Hong)
Role: Collaborator (No fund distributed to ISU)
- **Purpose:** Develop a web-based/mobile friendly tool that identifies older adults in urgent need of home assessment and modification.
 - **Impact:** The results of this study serve as groundwork for larger studies to pre-screen older adults at risk of experiencing unwanted outcomes at home. Such a tool will allow occupational therapists to design home assessment and modification practices tailored to older adults' different disease types and clinical conditions. We believe that this line of research will support evidence-based guidelines of home assessment and modification services through promoting data-driven decision-making practices in occupational therapy.
 - **Delivery:** Two journal publication and website:
https://mjlee.shinyapps.io/Shiny_Project_MJ/

External Grants and Awards for Research [Not funded]

- 2019-2022 **National Science Foundation** (NSF) - Engineering Research Centers (ERC) research grant
Title: Smart home technology for successful aging in place (P.Is: Balaji Narasimhan & Jennifer Margrett)
Role: Collaborator. As a multidisciplinary research team (more than 65 researchers), I have participated in T2a group for a designing a smart home.

Internal Grants and Awards for Research

- 2023 **ISU Foreign Travel Grant**
Invited lectures and research collaboration meeting, Seoul, South Korea (\$1,500)
- 2022 **CEAH - Summer Research Support:** Meaning of Aging in Place to Older Korean Immigrants (\$6,000)
- **Purpose:** The main purpose of this research is to understand the challenges and barriers of aging in place of Korean older immigrants and discuss their needs for successful aging in place.
 - **Impact:** The impact of this research is significant as it addresses the challenges and barriers of aging in place that are specific to older immigrants, particularly Korean immigrants. By understanding their perceptions and experiences, this research can shed light on how to better support older immigrants in pursuing successful aging in place.
 - **Delivery:** Conference presentation & journal submission (2023 Fall)
- 2021 **Publication Subvention Grant - Scholarly work:** Space planning for Healthcare settings (\$9,500)

- **Purpose:** This grant aimed to publish a textbook for scholarly work. Through this grant, I completed the healthcare design book titled "Space planning for healthcare settings."
- **Impact:** This book on interior space design for healthcare facilities is targeted at third- or fourth-year undergraduate students enrolled in a CIDA accredited Interior Design program, a NAAB accredited Architectural program, or a NASAD accredited Design program. Additionally, it may be used in graduate programs in Design, Interior Design, Architecture, or Design Studies, or by lifelong learners who have an interest in clinical healthcare environment design.
- **Delivery:** This book will be published in 2024

2020

2020 BNIM Regenerative Design Challenge Grant: A Best Practice Manual for Aging in Place: Revitalizing Small Communities for Aging Population in Iowa (\$9,500)

Role: Principal investigator

Co-investigators: Sungduck Lee, Biswa Das, and Cameron Campbell

- **Purpose:** The proposed research aimed to investigate further of the challenges associated with making home modifications, especially in a small town context in Iowa. The objectives of this research are: 1) to collect and analyze data using GIS that will help categorize existing housing types at the community scale; 2) to determine specific home modification strategies based on individual's needs; and 3) to make pragmatic policy recommendations that could be used to address the challenges related to modification and allow for successful aging in place.
- **Impact:** This research contributed to enhancing the understanding of the complexities and unique challenges of aging in place in small-town Iowa. By addressing these challenges, older adults and those with disabilities will be able to remain in their homes longer, leading to improved quality of life, increased independence, and reduced healthcare costs.
- **Delivery:** Conference presentation (HERA 2022) and invited extension/outreach publications

2019

Bridging the Divide from the office of the vice president for research: Saving Older Adults Living in Darkness: Ambient Intelligence Technology of Lighting System (\$24,916)

Role: Principal investigator

Co-investigators: Carl Chang and Jennifer Margrett

- **Purpose:** As an interdisciplinary research project, the purpose of this research aims to create new smart home lighting solutions by developing integrated ambient intelligence technology providing a proper level of illumination in older adult's homes.
- **Impact:** This research project create a broader impact on smart home design for older adults and contributed to the advancement of knowledge and development of new technologies and new collaborations with computer science and gerontology.
- **Delivery:** Conference presentation (EDRA 51 and IDEC 2021) and [peer-reviewed publication](#) (HERD)

Recognitions for Research / Creative Activities

- 2023 **Nominated, Housing Impact Award**, Housing Educator & Research Association
(Will be announced in October 2023)
- 2022 **Faculty Research Award**, College of Design, Iowa State University
- 2020 **2020 HERA Kenneth Tremblay Early Career Award**, Housing Educator &
Research Association

Outreach

Extension / Outreach Publications [Editor Reviewed]

2021 **Kim,D.**, Lee, S., Das, B., Campbell, C. Aging in Place: Revitalizing small communities for aging population in Iowa, *The Iowa County*, 50(2), 14-15
The main goal of this publication is to introduce our research project sponsored by BNIM grant project. Given that most readers of this journal are extension

officers and community staff, this manuscript provided a critical framework for revitalizing small communities for aging population in Iowa.

Internal Grants for Extension

2022

Fieldstead & Company Endowment for Community Enhancement Fund:

Revitalizing Small Communities for Aging Population in Iowa: Making Home Modifications More Accessible (\$5,000)

Role: Principal investigator

Co-investigators: Biswa Das, Nicole Peterson, and Jae Hwa Lee

- **Purpose:** The purpose of this project is to conduct a home modification pilot project for older adults living in a rural community in Iowa.
- **Impact:** This project demonstrated a model for small municipal and county governments to work with experts and volunteers to help older households modify their homes to age in place. It allowed the elderly to stay in their social network, promoting social engagement and sustainability. It also helped communities retain older individuals who might have moved due to unsuitable living spaces. Finally, it provided students with practical experience in understanding aging in place and designing outreach to the community.
- **Delivery:** Conference presentation (HERA 2022) and Journal publication planning (2023 Fall)
